

Cook & Hold Oven

Model 1200-SK

Smoker Ovens effortlessly infuse bold flavors with real wood chips. No pressure-cooking or artificial smoke flavor required.

Gentle, low and slow Halo Heat® technology evenly surrounds food without the use of extremely hot elements, added humidity or fans. This controlled, uniform heat maintains precise temperatures throughout the hot smoking, cooking and holding process—improving food quality and extending hold times.

Cook by time or probe with simple or deluxe controls. Probes sense internal product temperature and automatically convert the oven from cook mode to hold mode once set parameters have been reached.

Labor-free, overnight smoking, cooking and holding paired with effortless operation reduces labor costs and increases productivity.

Advanced controls – designed intentionally simple – feature an intuitive, user-friendly interface and programmable recipes to ensure consistency with each cook.

ChefLinc™, cloud-based remote oven management software, streamlines processes and maximizes profits with data-driven insights (deluxe control only).

ISO 9001:2015-certified.
